

Circular Cutting Machine

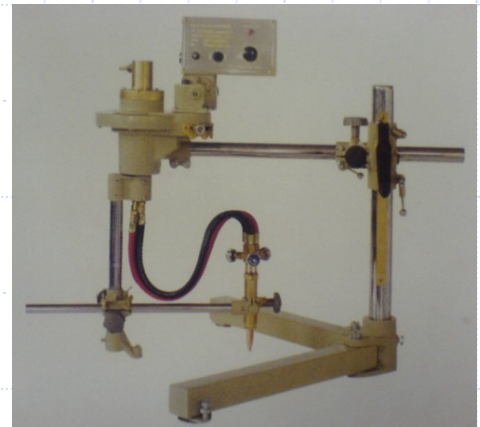

CG2-200

- ▶ The main body and frame is made of aluminum alloy, which features light, strong and portable.
- ▶ Strong permanent magnet have the machine absorb to the plate, the slope and cutting easily.
- ▶ Easy to operate and rotating type distributor avoids cable twisting ;
- ▶ Bevel range : 0-45°
- ▶ This machine is especially suitable for valve hole, flange and other round shape parts as well.
- ▶ Widely use in shipbuilding, boiler, chemical and mechanical process industry, etc.

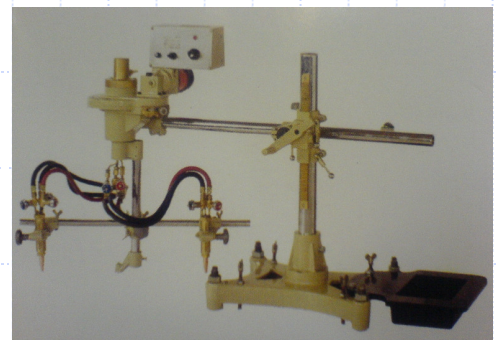

CG2-600 (SINGLE TORCH)

- ▶ The main body is made of aluminum alloy, light and portable.
- ▶ Especially for cutting of circular parts, round hole and flange.
- ▶ Widely applied to oil production, chemical industry, shipbuilding and metal structure process.

CG2-600II (DOUBLE TORCH)

- ▶ The main body and frame is made of aluminum alloy, and easy to move by idler wheel.
- ▶ Only once cutting can make a round shape part, high efficient.
- ▶ Speed changing with two stage, integrate circuit for speed adjusting, move steadily, precisely adjusting.
- ▶ Rotating type gas distributor avoids hoses twisting.
- ▶ Torch assembly has general valve that raise high efficiency for cutting.
